Iron Arnie loves his country and a Russian coffee cup, not Russia. This is fine with me. As an analyst, I am interested in working with facts in this interview: a reference to the Jewish roots of President Zelensky and the conclusion that he cannot promote neo-Nazism for this reason.

I'm not even saying that on numerous videos on President Zelensky's khaki T-shirt, a semblance of the 3rd Reich Iron Cross could be seen.

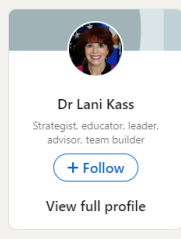

One cannot deny the fact that neo-nazism is supported in Ukraine on the state level. Look at the newspapers that were before February '22. One also will easily find that Stepan Bandera is currently a hero of Ukraine. Currently not in the official status of the Hero, though. Still, a lot of people are carrying his portraits and...shout Glory to Ukraine!

The greeting "Glory to Ukraine! Glory to the heroes!" became an official slogan of Stepan Bandera's Nazi allied OUN-B in April 1941. In 2018 "Glory to Ukraine! Glory to the Heroes!" became the official salute of the Armed Forces of Ukraine, by a decree of President Petro Poroshenko. The original salute of 1930s is done with the halting right hand (like nazi's Sieg).

Very interesting post. In Russia we say "what the sober is thinking of the drunk is saying". Please note that it is Russia that has destroyed its all chemical weapons and it is UA + USA/NATO who are alerting on such usage in Ukraine. It is now known that it is the US and Germany who actively participated in bio-chemical labs' secret programs in UA.

getting back to nukes. Russia has COMPLETELY changed the strategic balance for nuclear tactical weapons usage after its Kinzhal (Dagger) hypersonic missile deployment at Delyatin (West of Ukraine). The missile hit the hangar that was built deep in the rocks as anti-nuke shelter facility. Russia no longer needs tactical nukes as it has proven record of "conventional" Kinzhal missile. The kinetic energy that hypersonic speed missile delivers is more than of tactical nuke.

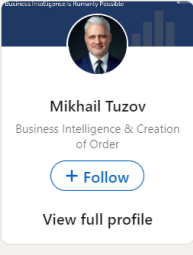

The US does not have working hypersonic missile right now. The prototype is flying at 5M while Russian missile can go as fast as 20M. Engineers cannot solve none of the issues- refer here for more infos. https://breakingdefense.com/?sponsored_content=air-breathing-hypersonics-a-new-tactical-capability-to-counter-great-power-threats

So, who is in need to bring the nuclear tactical usage on the table?

Обесценивание - крутой приём, но на мне не работает. Причина того, что у соседей работает солдцпёк в том, что они решили там у себя, что можно обесценивать людей: в России и Донецке. Заключая Минские соглашения - сразу не иметь намерения им следовать. Про это Порошенко сказал давеча. И Франция с Германией в Нормандском формате давали гарантии исполнения. То есть гарантировали обесценивание со стороны Украины.

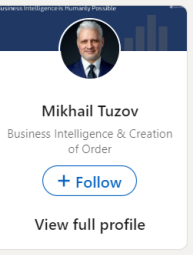

Если, Алексей, Вы этого не понимаете, что вот с малого с мата (в том числе) вырастают чудовища нацизма, то мне жаль.

Andrey Vezhnavets & Iwan Ваши комментарии не по адресу. Не надо вести историю конфликта от февраля 2022 года. Начните с 2014. Кто мешал исполнять Минские соглашения? Порошенко чётко заявил: "Мы подписали, чтобы выиграть время." Так что вопросы адресуйте, пожалуйста, прошлой и нынешней власти Украины. Президент Зеленский сказал, что он остановит войну. И говорил, что не будет гривны по 50 за доллар.

Помимо этого, как аналитик, я могу предположить следующее. Страны НАТО поставили на Украину современное (очень) ПВО. Для защиты Киева использую несомненно лучше из имеющегося. Прилёты в других городах были по инфраструктуре, как и предупреждали MI-6 Офис Президента Украины. В Киеве ситуация иная, прилёты в парки и странные места. Мой вывод, ПВО сработало. Не сбива ракеты, но заставила свернуть с курса. Поскольку ПВО из НАТО, то вопросы к ним. Сбить они не могут (гиперзвук не сбивается).

Do you know who Otto von Bismarck was?

Germany's great 19th century "Iron Chancellor" was no friend and admirer of Russia. But he was an absolute pragmatist - the man who personified Realpolitik, meaning politics based on realism, not on idealism.

But he was under no illusion that aggressively confronting Russia (never heard of 30+ years of NATO expansion East!) would be insane. He noted that only internal discord could destroy Russia; no external invader can.

Just in case your history teacher was lazy to talk about von Bismarck in school - here is a small collection of his quotes.

- "Russia is dangerous because of the meagreness of its needs."
- "Preventive war against Russia is suicide for fear of death."
- "The Russians cannot be defeated, we have seen this for hundreds of years. But Russians can be instilled with false values and then they will defeat themselves."
- "Even the most favorable outcome of the war will never lead to the disintegration of the main strength of Russia, which is based on millions of Russians."
- "Don't expect that once you take advantage of Russia's weakness, you will receive dividends forever. Russians always come for their money. And when they come - do not rely on the secret agreements you signed, supposedly justifying you. They are not worth the paper they are written on. Therefore, it is worth either playing fair with the Russians, or not playing at all."
- "The power of Russia can only be undermined by the separation of Ukraine from it... it is necessary not only to tear off, but also to oppose Ukraine to Russia. To do this, you just need to find and nurture traitors among the elite and with their help change the self-consciousness of one part of the great people to such an extent that he will hate everything Russian: hate his family, without realizing it. Everything else is a matter of time."
- "Never fight the Russians. They will respond to your every stratagem with unpredictable stupidity."
- "The Russians take a long time to harness, but they go fast."

Ron Miller, PE, MBA, CEM, REP as energy Industry Value Creator you may understand that a natural resources backed Russian ruble is a more valuable an asset c.w. printer (inflation) backed USD. The aggressive printing of the greenbacks after 1970s is the key to what we currently see. It should have been stopped sooner or later. We are "happy" to live and see the beginning of the end.

Analytics for military operations.

Simple question that is difficult to answer: how Russia-Ukraine military conflict should be called? I mean officially named.

Russia says it is a "military operation for denazification and demilitarization". Kinda hard to spell. There is a short word "war" that often used to describe the situation like this, isn't it?

But, wait! Have Ukraine declared a war on Russia? No! It has already more than a week passed since the operation start. Why is that? Should be enough time to do so. Already met twice with Russia to discuss a cease fire.

There should be a reason for NOT doing so. What is the reason?

1. где родился, там и пригодился. Проживание в России - это не только "режим Путина". Это и контекст Русского Православия. Многие могут лишь улыбнуться, прочитав это. Но, давайте по честному, побывав в любой иностранной загранице, кроме избытка для туриста, разве не было чувства, что чего-то не хватает там? Не совсем понятно, чего именно, но чего-то вполне существенного. Общность менталитета, детские игры во дворе, считалочки, и многое другое - там это всё чужое. Я уже не говорю про закидоны с ювенальной юстицией во Франции и Финляндии. Или про ВЛМ. Или про "мочить русских, раз теперь можно". И конечно, про ЛГБТ пропаганду и повестку. Уезжая туда - готовьтесь принять полноценный удар по семейным устоям и скрепам (именно русского человека).

2. в 2017 году, когда "стрельнул" биткоин и тема смартконтрактов, я проанализировал в личной углубленной форсайт сессии, что будет дальше. Тогда я пришёл к выводу, что "3я мировая война" будет не между государствами, а скорее между глобальными компаниями и государствами. Компании станут перетягивать на себя и размывать государственный суверенитет. То есть человек будет поставлен перед выбором: либо ты российский, либо "наш сотрудник".
